The University of Melbourne
Department of Computer Science and Software Engineering
**433-254 Software Design**
Semester 2, 2003

**Tutorial 7**
Week 8

1. What are exceptions and how are they handled in Java? Give an example.

2. While reading a file, how would you check whether you reached the end of the file?

3. How do we design, create, and access a package? Discuss with suitable example.

4. Discuss the various levels of access protection for packages and their implications?
